

FOR IMMEDIATE RELEASE

NETWORK INTERCEPT – SCAN-ON-THE-GO Selected by FLASH MEMORY SUMMIT 2008 as A BEST OF SHOW Awards Winner

Recognized for Most Innovative Flash Memory Customer Implementation

Aug. 14, 2008, Los Angeles – Network Intercept, a cyber-security company dedicated to keeping individuals and businesses safe from malicious intent on the internet, announced that it has been chosen by the Flash Memory Summit as a Best of Show awards winner for 2008 for their Scan-on-the-Go product in the category of Most Innovative Flash Memory Customer Implementation. The annual Best of Show awards is the premier opportunity for industry recognition of innovative products and solutions, and how they are being used in the marketplace.

“Network Intercept is committed to helping people protect their identity and their valuable content on the internet no matter where they are in the world or which computer they are using.”

- Christopher Ciabarra, President and Founder

Winning companies were judged by a panel of industry experts who evaluated each nomination according to the following criteria:

- Distinctiveness of the application, technology, or product
- Central use of flash memory as a customer solution
- Technical and business significance

“Flash memory is being used today in ways that raise the bar of innovation and solve end user challenges with new techniques that truly make a difference for a specific company’s overall success,” said Jay Kramer, Chairman of the Flash Memory Summit Best of Show Awards Program. “We are proud to award Network Intercept’s Scan-On-the-Go with the Best of Show Customer Implementation.”

Network Intercept was honored at the Flash Memory Summit Awards evening reception in the Exhibit Hall on Wednesday, August 13.

About Network Intercept

Founded in 2004, Network Intercept is a privately held company which has created a series of products to protect businesses as well as individual home users from the known and unknown threats on the internet. The company's unique approach to security and identity theft protection can protect users even when they are using computers other than their own.

About the Flash Memory Summit

Produced by Conference ConCepts, Inc., the Flash Memory Summit is the only conference dedicated entirely to flash memory and its applications. It is intended for system designers, analysts, hardware and software engineers, product marketing and marketing communications specialists, and engineering and marketing managers. It features forums, half-day tutorials, paper and panel sessions, and expert tables. Subjects include harsh environments, laptops, enterprise storage system applications, consumer products, performance, product design, caching methods, design methods, software, new technologies, market research, testing and reliability, and security. The Summit also includes exhibits of the latest products and product awards. For more information, visit www.flashmemorysummit.com.

About Conference ConCepts, Inc.

Founded in 1994, Conference ConCepts is a full-service professional conference and association management company that provides extensive capabilities in all aspects of technical conference management. Conference ConCepts develops and produces events both on its own, and in partnership with associations, corporations, and publishers. The skill sets of the company’s employees and contractors, representing over 200 cumulative years of experience, enables Conference ConCepts to offer clients a choice of services, ranging from assistance with a single aspect of a conference to the complete development and administration of a full-fledged “turnkey” event. For more information about Conference ConCepts, visit: <http://www.confconcepts.com>.
